

# June the Giraffe

June the Giraffe grew up in Africa and moved to North America to help educate folks about her fellow giraffes. She spends much of her time roaming around, showing folks how giraffes live. June only drinks water every couple days, but boy, does she love to snack. Lettuce leaves are her favorite and she'll eat them all day long. In June's free time, she scrapbooks! She just loves documenting stories about her family, as she has relatives all over the world. In fact, you might have heard of her famous cousin, April.
